To provide best practice respiratory product solutions for patients and clinicians, offering quality, innovation and choice.

Intersurgical

Intersurgical is a global designer, manufacturer and supplier of a wide range of high quality medical devices for respiratory support. We provide flexible patient solutions for airway management, anaesthesia, critical care and oxygen & aerosol therapy, for use within emergency care, hospitals and also in the home.

With over 35 years experience we understand the changing and challenging clinical environments and needs of our customers and their patients.

Our integrated approach enables us to provide the highest standards in design, manufacture, quality and customer care allowing us to respond quickly and effectively to our customers and consistently meet their requirements.

Our company goal is to provide best practice respiratory product solutions for patients and clinicians, offering quality, innovation and choice.

Quality	Innovation	Choice
<p>All of our products are designed and manufactured to meet the requirements of relevant international, European and national standards, and our Management System is assessed and certified as meeting the requirements of ISO 9001 and ISO 13485.</p>	<p>Innovation is important in all areas, helping us to deliver high quality products and services matched by cost effective solutions to meet today's needs.</p>	<p>Our wide product portfolio allows for both patient and clinical requirements to be met.</p>

We are also committed to lowering the environmental impact of our products and services and have implemented an Environmental Management System certified to international standard ISO 14001.

We hope we can provide a solution for your needs.

Product range

Our product range although focussed is split into four key product groups. Continuous development of new products is driven by our customer needs, changes in the market and strategic importance to the company, providing new opportunities to increase our market share.

Airway Management

A range of airway management devices including a comprehensive choice of supraglottic airways, from the innovative i-gel® to a full choice of laryngeal mask options. The range also includes the i-view™ video laryngoscope, Guedel airways, endotracheal tubes, laryngoscope blades, patient connections, breathing filters, HMEs and HMEFs.

- Airway Devices
- Airway Accessories
