

BioFire® FilmArray® Torch

Easier testing. Faster results.

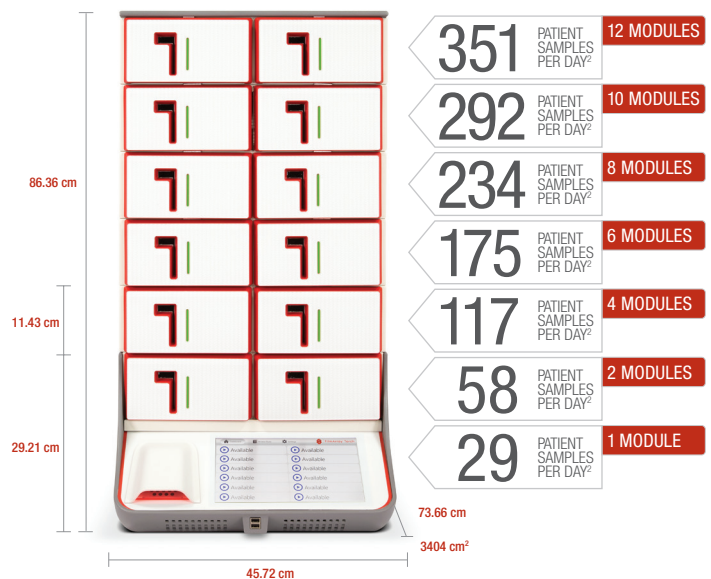

Syndromic testing from BioFire can help your lab operate more efficiently and effectively. Syndromic testing—a broad grouping of probable pathogens into one simple test—is a fast, comprehensive, and reliable method for identifying potential pathogens in a clinically relevant timeframe. The BioFire Torch provides more answers with less space, faster test results with minimal hands-on time, and peace of mind with a skilled customer support team dedicated to client success.

More answers. Less space.

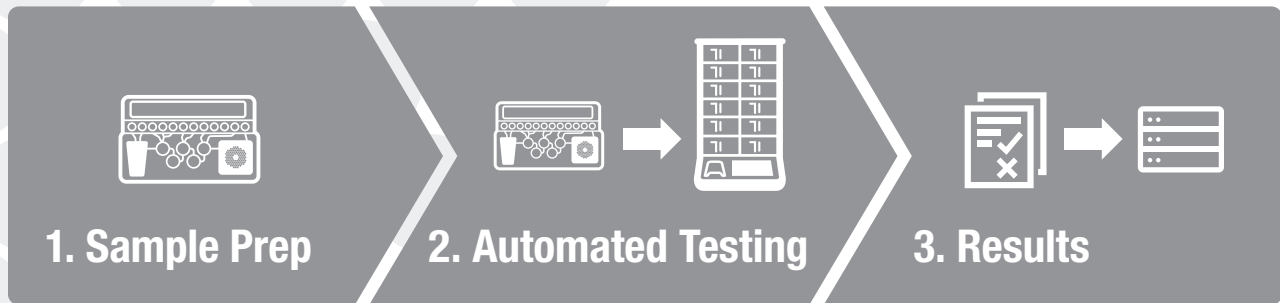

With over 117 targets across five FDA-cleared and CE-marked panels, the BioFire Torch gives labs a single platform to consolidate and simplify lab testing.¹ And with the ability to stack vertically, the BioFire Torch can easily scale to meet diagnostic testing needs without eating up additional bench space.

- 
Easily Scalable
 With a modular design, the BioFire Torch can scale vertically from 1 to 12 modules per base.
- 
High Throughput
 One BioFire Torch is capable of running up to 351 tests per day due to its vertical scalability and speed.
- 
Small Footprint
 The BioFire Torch can help labs consolidate testing in any space—no matter how small the lab.

¹ Panels: BioFire® FilmArray® Respiratory 2 Panel, BioFire® FilmArray® Meningitis/Encephalitis Panel, BioFire® FilmArray® Gastrointestinal Panel, BioFire® FilmArray® Blood Culture Identification Panel, and BioFire® FilmArray® Pneumonia Panel.
² Calculations based on running the BioFire Respiratory 2 Panel over a 24-hour day.

Fast results. Simple workflow.

 **2 Minutes of Hands-on Time**

 **Results Sent Directly to Laboratory Information System (LIS)**

 **Results in About an Hour**

 **Any Tech, Any Shift**

Peace of mind all the time.

BioFire's and bioMérieux's skilled customer support teams provide global product support, solution training courses, LIS connectivity assistance, and instrument or chemistry-related troubleshooting.

Customer Support

For technical assistance and support please contact your local bioMérieux representative or distributor. Our website provides documents to assist with verification and continuing education for all customers. Visit biofiredx.com/Support for supporting information.

Field Application Specialists

Our specialists make frequent onsite visits to help set up equipment and troubleshoot any issues.

System Support Engineers

This team provides BioFire customers with onsite assistance for more complex situations, like networking and interfacing.

Medical Education Liaisons

Liaisons help educate ordering physicians on the details of BioFire's comprehensive approach to infectious disease diagnostics.

Not all panels available in all countries. Consult your local bioMérieux representative.
